## > THE ULTRA 3WAY

Three products in one pass

The Ultra '3Way' has been designed to offer recyclers and materials management companies a compact three grade screen that can be loaded and operated from one side, a first in a screen of this class.

The unit features a variable speed feed hopper and a 10ft x 4ft double vibrating deck, allowing for high screening rates and handling of a full range of materials, including waste, soils, glass/metals and wood chips.
